

**MATHEMATICS 2001  
GROUPWORK REPORT**

Leader:  
Scribe:

Presenter:  
Meeting date/time:

Other members present:

**Log of activities (with times, continue on back)**

*Example entry: Taking up homework for Wed, Aug 24 (15 minutes). We each explained the theorems we had studied and answered questions from everyone else on their meanings. Amelie's theorem was particularly interesting to the group because it concerned the notion of a continuous function, and we'd all forgotten what that was, so we learned it again.*

**Questions for your teacher.**

**What could your group do better next time?**
