

## Math 2001: Homework W7

**Due: December 12, 2008**

The following assignment will be graded with an emphasis on clarity of exposition. You should write in complete sentences, be as precise as possible, and be mathematically correct (both in content and format). Be sure to include a title, a short introduction to the topic, and to define all the relevant mathematical terms. The assignment should be **typed**.

From writing assignments 1, 3, 4, or 6, choose an assignment you turned in, and revise it. You will turn in both the original graded draft and the new draft, and the new grade will replace the old. You should be sure to

1. Clean up all the mistakes,
2. Make sure the arguments are complete, efficient, and well-written,
3. Implement everything you've learned about writing a math paper over the course of the semester.
