# DOING MATH AS IF SURVIVAL MATTERS

Prof. Marty Walter

We will give a snap shot of the second edition of my book, "Mathematics for the Environment: Teaching Math As If Survival Matters." How is the Pandemic a warmup for other crises like global warming, collapse of industrial agriculture, universal pollution, the sixth extinction and more. A mathematical perspective implemented by elementary mathematics is useful in redesigning our civilization so that it (and we) shall survive.

**TUESDAY, NOVEMBER 24, 2020 | 10:30 AM**
